Market Analysis

Egypt Tourism App

Market Overview · Product & Services · Competitors · SWOT · PEST
Milestone submission · October 2026

1. Market Overview

Egypt has one of the most varied tourism offers in the region: historical landmarks, cultural sites, beaches, desert trips and Nile cruises. And the market is growing fast.

Indicator	Figure
Tourists who visited Egypt in 2025	About 19 million
Growth compared with 2024	+21%

The problem we see

Planning a trip in Egypt today means jumping between many apps and websites. Travelers use one to find attractions, another to compare hotels, another to organize their days, and others to book tours and transport and keep track of reservations. That takes time and makes it hard to put a whole trip together.

The opportunity

> **MARKET OPPORTUNITY**
>
> Bring discovery, trip planning and booking together in one app, so travelers can go from "what's worth seeing?" to a ready, organized trip without switching platforms.

A growing number of tourists doesn't automatically mean people want a new app, so we'll test this with customer interviews and by trying competitors ourselves.

2. Product and Service Analysis

Our app lets people travel around Egypt in two ways: pick a ready-made trip, or build their own, step by step. We run trips ourselves and also partner with tourism companies. Everything in the app is halal.

Planning the trip

Feature	What it does
Ready-made trips	Trips already planned and sorted into categories, so users can pick one and go
Build your own trip	Users choose when the trip starts and ends, the places, activities, hotel and transport at any stage, plus a tour guide if they want one. The total price appears at the end
Personality test (optional)	A quick test that helps tailor the trip to the user's taste
Videos of every place	Users can watch a video of a place before deciding to visit
Nearby map	A map of places to go out to around the user

Trust and safety

Feature	What it does
Verified users	Everyone signs up with their national ID (Egyptians) or passport (foreigners)
Report system	Users can report anything: a tour guide, a place or a service
Halal only	Alcohol-free hotels and halal places only, including sports clubs, never nightclubs

Rewards and savings

Feature	What it does
Points system	Users earn points, for example by filling in the end-of-trip survey and uploading a photo of the place, and redeem them for rewards or even a free trip
Group discounts	The more people on the trip, the bigger the discount

Partners and sponsors

Feature	What it does
Tourism company partners	Partner companies offer their trips through the app
Sponsored places	Sponsors get featured, and users get a notification when they're near a sponsored place

How the app makes money

Revenue stream	How it works
Our own trips	Profit on trips we organize ourselves
Commission	A percentage on every trip sold by a partner company
Sponsors	Places pay to be featured and to reach nearby users through notifications
Our own places (future)	Cafés and similar venues run by us

Now and later

At launch	In the future
Ready-made and custom trips Verified sign-up, reports and halal-only partners Points, survey rewards and group discounts Place videos, nearby map and sponsor notifications	Our own cafés and venues More partner companies and sports clubs More destinations and categories

> **UNIQUE VALUE PROPOSITION**
>
> Plan your whole trip in Egypt, ready-made or your own way, with verified people, halal places and rewards for every trip you take.

3. Competitor Analysis

We compete with two kinds of players: platforms in Egypt that try to do something similar, and big platforms that each cover one part of the trip.

Direct competitors (in Egypt)

Competitor	What they offer	Overlap with us
Itinfy	Trip planning, stays, tours, activities, transport and AI travel planning	High: the broadest overlap with our services
SIA Egypt	Help finding stays, restaurants, attractions and other travel services	Medium: also connects different parts of the trip
GuideMe Egypt	Connects travelers with local guides for guided experiences	Low to medium: overlaps on local experiences

Indirect competitors

Competitor	What they're best at	What they don't do
Google Maps	Navigation, directions, nearby places	No trip planning or booking
Booking.com	Hotel discovery and booking	Only covers where you stay
Tripadvisor	Reviews and recommendations	Doesn't build your trip for you
GetYourGuide	Tours, tickets and activities	Only bookable activities
Wanderlog	Itinerary planning on a map	Not focused on Egypt; no local bookings

Some of these operate globally rather than in Egypt, but they still compete for travelers' time and money.

Our competitive advantage

Saying "we combine several services" isn't enough, since other platforms already overlap with parts of what we do. Our real edge is a whole trip in one place, ready-made or built your way: places, hotel, transport and guide, with one price at the end.

No competitor combines that with what makes us different: verified users, halal-only places, a points system that rewards every trip, and videos of each place before you go.

4. SWOT Analysis

Strengths
INTERNAL

- Ready-made and fully custom trips in one app
- Verified users (ID or passport) and a report system build trust
- Halal-only places, a clear fit for families and Gulf visitors
- Points and rewards bring people back
- Videos of every place before you go

Weaknesses
INTERNAL

- Needs serious investment in development, upkeep and support
- New brand with little awareness or trust
- Asking for ID or passport at sign-up may put some people off
- Storing ID and passport data needs strong security
- Depends on partner companies and sponsors

Opportunities
EXTERNAL

- Egypt's variety: history, culture, beaches and local experiences
- Growing demand for halal, family-friendly travel
- Partnerships with hotels, tour companies and sponsors
- Multilingual travel help
- Travelers who want custom trips, not fixed packages

Threats
EXTERNAL

- Established travel and booking platforms
- Economic changes and regional instability
- People who don't trust booking online
- Data leaks and cybersecurity risks
- Uneven partner quality and licensing rules

What we'll do about it

Strategy	Action
Use our strengths	Use the all-in-one planning idea and local partners to create trips that feel easy
Cover our weaknesses	Launch a focused MVP first and grow step by step
Beat the competition	Lead with coordinated itineraries, clear costs and reliable support
Reduce the risks	Prove customers want it and suppliers will join before building everything

5. PEST Analysis

Political & Legal

GOVERNMENT AND LAW

- The government actively supports tourism
- Visa rules, tourism licenses, consumer protection, privacy and payment rules all apply
- Since we organize our own trips, we need the right tourism license
- Storing national IDs and passports means following Egypt's Personal Data Protection Law

Economic

MONEY AND COSTS

- Tourism growth means more potential customers
- Exchange-rate swings affect travel budgets and supplier prices
- Costs for development, ads, support, maps and supplier integration
- We need clear pricing and options for every budget

Social

PEOPLE AND CULTURE

- Travelers speak different languages and have different budgets and expectations
- Some want ready-made plans; others want freedom
- Reviews and trust drive decisions
- Families, couples, solo and budget travelers all need different things
- Many Egyptian, Arab and Gulf travelers prefer halal, alcohol-free places

Technological

TECH AND DATA

- Mobile maps, digital payments, booking systems and AI make personal travel services possible
- Wrong information, old prices and broken bookings can ruin the experience
- Cybersecurity and API changes are real risks
- Location-based notifications and video content need a strong, reliable app
- We'll protect user data and keep place information up to date
